SUMMARY

Driven and high-performing Honours Computer Science student with robust experience in Java, JavaScript, Python, and C. A proven communicator with hundreds of hours of experience tutoring a variety of age groups. Experienced applying these skills in a professional internship setting, and excited to continue learning from other developers and professionals in a team.

PROJECTS

TeXQuick

Node.js, Vite, React, KaTeX

- Built a small LaTeX note-taking web app using React and Vite, focused on efficient and streamlined maths syntax

Birds of Aotearoa (Academic)

Node.js, Express.js, EJS, MySQL

- Developed a full-stack web app for managing a MySQL database of New Zealand birds
- Implemented full support for CRUD operations on the database, including image uploading

ANDIE: A Non-Destructive Image Editor (Academic)

Java, Gradle

- Led a team to develop a Java image editing application, delegating tasks according to members' strengths and interests
- Implemented a range of non-destructive and reversible image operations
- Created a macro system which allowed for recording and replaying image operations

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, C, Python, Julia
- **Web Development:** HTML, CSS, React, Node.js, Express.js, EJS
- **Database Management:** SQL, PostgreSQL, MySQL, Neo4j
- **Tools & DevOps:** Git, GitHub, GitLab, Jenkins, Jira

PROFESSIONAL EXPERIENCE

Fisher & Paykel Appliances

Product Development Summer Intern

November 2025 – February 2026

- Developed C static analysis tool in Python
- Integrated static analysis and unit test tools into GitHub Actions CI/CD pipelines
- Integrated simulated temperature model into automated Jenkins testing for hardware-in-loop testing
- Refactored embedded C files to improve static analysis results

Cluey Learning

Online Tutor

March 2024 – Present

- Communicated ideas in mathematics to students of all levels in Australia and New Zealand
- Adapted communication style to suit a wide range of client needs on the job

EDUCATION

University of Otago

Dunedin, Otago

Bachelor of Science (Honours), Computer Science

February 2023 – November 2026 (expected)

- Cumulative GPA: 8.7
- Worked with a range of languages and technologies including Java, JavaScript, C, Julia, and SQL
- Gained experience working on projects in fast-paced and collaborative environments

West Coast Trades Academy

Greymouth, West Coast

Computer Programming and Web Design

February 2021 – November 2022

- Excelled as a top student learning the basics of programming and web design
- Took an impassioned interest in learning from experienced mentors
